**DETAILED ACTION**

1. Claims 2-10 and 12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

a. In claims 2 and 10 "MOST" is indefinite.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

b. Claims 1-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Murakami.

c. Murakami discloses a vehicle multimedia system (col. 7, line 3) including plural multimedia units (col. 7, lines 29-36), each multimedia unit, or node, comprising first transceiver unit 11/29 for receiving incoming signals and outputting signals in the ring network, and transmission means for sending signals to supervisory controller 7 (col. 12, lines 24-38).

d. Although Murakami does not specifically state that signals are also received from the supervisory controller, since the controller <sup>controls</sup> ~~from~~ the node, it would have been obvious to one of ordinary skill in the art to include

secondary receiving means at each node unit to receive node control signals.

e. Regarding claim 2, Murakami teaches use of a ring bus (Fig. 1, Fig. 4).

f. Regarding claim 3, use of radio receiver versus other type of receiver would have merely been dependent on what type of signal transmission medium was used.

Regarding claims 4-9, Murakami teaches use of navigation system, TV, radio, DVD, CD, Disc, Tape and other multimedia devices (col. 7, lines 29-36).

3. 3.The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Nagatsugawa (061), Moller, Nagatsugawa (777) and Nagatsugawa (012) disclose multimedia ring and transmission devices.
